INTRODUCTION

ANAB is recognized by the General Incorporated Foundation VCCI Council to provide accreditation to laboratories in electromagnetic field seeking recognition by the VCCI Council.

The VCCI Council recommends voluntary technical control for electromagnetic emissions from information technology equipment, such as computers, telecommunication products, and electronic office products.

This document establishes specific program requirements as defined by the ANSI National Accreditation Board (ANAB).

DEFINITIONS

All definitions from the documents referenced above apply.

1. SCOPE OF ACCREDITATION

1.1. ANAB will provide accreditation for technical requirements developed and recognized by the VCCI Council.

1.2. The latest list of the technical requirements is available on VCCI website www.vcci.jp.

2. CONFIDENTIALITY AND DISCLOSURE OF INFORMATION

2.1. ANAB will notify the VCCI Council of action that adversely affects the accreditation status, such as scope reduction, nullification, temporary suspension, and withdrawal of accreditation of a laboratory accredited under the VCCI program.
3. COMPLAINTS AND APPEALS

3.1. All complaints and appeals shall be subject to ANAB procedures. Complaints and appeals related to VCCI laboratories may require review and input from the VCCI Council to ensure consistency of the program.

3.2. The laboratory must abide by the decisions of the VCCI Council on resolution of complaints and appeals related to the VCCI-specific requirements.

4. ACKNOWLEDGMENTS

4.1. The VCCI Council has the overall authority over any appeals, complaints, and disputes related to VCCI-specific requirements.

4.2. VCCI council representatives typically initiate an annual meeting with ANAB, usually taking place during the annual EMC Symposium in North America.
