ANAB is developing an accreditation program for certification of organizations conforming with ISO 41001, Facility management – Management systems – Requirements with guidance for use. ISO/IEC 17021-1 will be the base accreditation requirement document, and relevant ANAB Accreditation Rules will apply. ISO/IEC TS 17021-11, Competence requirements for auditing and certification of facility management (FM) management systems, also will apply.

ISO 41001 specifies the requirements for a facility management system when an organization:

- Needs to demonstrate effective and efficient delivery of facility management that supports the objectives of the demand organization.
- Aims to consistently meet the needs of interested parties and applicable requirements.
- Aims to be sustainable in a globally competitive environment.

ISO 41001 requirements are non-sector specific and intended to be applicable to all organizations or parts thereof, whether public or private sector, and regardless of the type, size, and nature of the organization or geographical location.

CBs already accredited by ANAB seeking accreditation for ISO 41001 will be able to purchase the application through EQM. New CBs interested in applying for ANAB accreditation should go to https://www.anab.org/management-systems-accreditation/certification-bodies/become-a-cb.
